

PROJECT SERVER WEB ACCESS
CAMAKO ADD LINES
UTILITY TO TIMESHEET

camako

RESOURCE AND PROJECT MANAGEMENT SOLUTIONS

Added functionality instantly

- **For Microsoft Office Project Server Web Access**

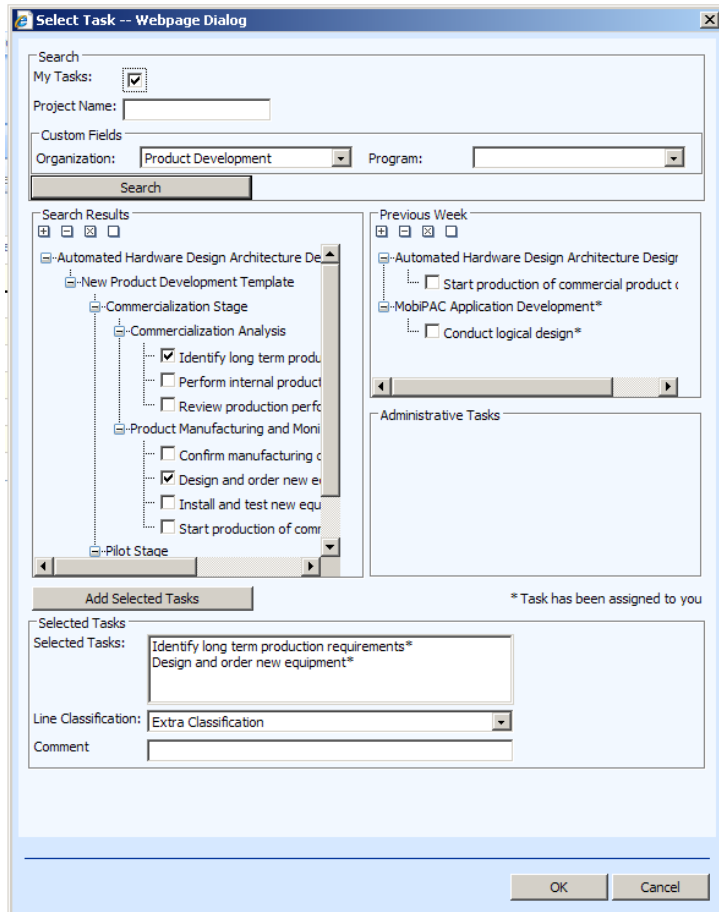

Add value to your investment and make the software's use easier and more efficient with the Camako Add Lines Utility for timesheet functionality.

- Simple and fast installation to your existing tool.

- Get also Camako's other component - Print Utility – to print and edit Gantt charts using the browser.

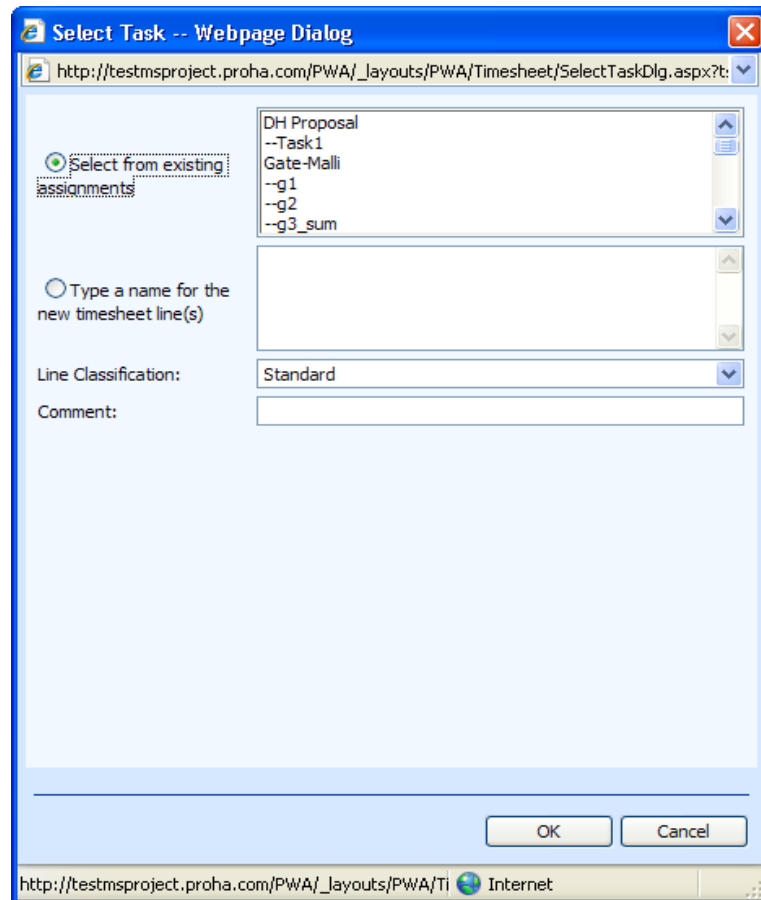

Benefits of the Add Lines Utility

- a) Search for project tasks by
 - Project Name
 - Custom Enterprise Fields
- b) Optional self assign tasks
- c) Previously added tasks are easy to find and add to weekly timesheet. Copy tasks from last week's time sheet.
- d) Prevent time reporting on "top level" and on summary task(s), both options configurable.
- e) Prevent time reporting on tasks or assignments, where Remaining Work equals zero (0)
- f) Administrative tasks can be added
 - List allowed for all users

Limitations in original Add Lines dialog

- Search of projects is not possible
- User can not self-assign tasks
- Previously added tasks are not easy to find and add to timesheet
- Administrative tasks cannot be added
- Possible to time report on "Top level" and on tasks with Remaining Work equals zero (0)
